Heartworm Prevention Product: _____ Last dose was on: _____

Heartworm Testing Waiver (Sign ONLY to decline)

A Heartworm test is recommended on all dogs over 6 months of age prior to elective surgeries. Heartworm disease can lead to severe complications, and even death, under or after anesthesia/surgery. **I understand that the doctors at Spay N Save Animal Clinic recommend heartworm testing before surgery to rule out heartworm disease, with or without the use of preventative.** I have read and understand the risk involved and choose to decline heartworm testing at this time. I do hereby release Spay N Save Animal Clinic and its staff from any liability should injury and/or death occur as a result of heartworms not being detected before surgery.

I, the owner (or authorized agent) decline the heartworm test and fully understand the additional risks involved if my dog is heartworm positive.
